## GIBAUD COMPANY PRESENTATION

GIBAUD SA designs and manufactures a complete range of orthopaedic medicine and bracing products, as well as compression hosiery and foot care products. The company is one of Europe's main players in the industry and holds a leading position in the French home market. With over 100 years of experience in the orthopaedic business the company holds an impressive patent portfolio.

The Polish market has become one of Gibaud's strategic export markets. Poland has a modern emerging economy with a booming healthcare sector. Gibaud is a leader of opinion in their home market and desires to express the same authority in all its export markets. That implies a continuous communication and exchange of opinion with the main actors in the field of orthopaedics. This enables us to stay ahead of competition and even more important offer our patients the latest in orthopaedic devices. Gibaud is part of the OSSUR-group, a world leading group in Orthopaedics (prosthesis and orthosis). Our partners in Poland are: Cabinet Mrs. Marguerite Michel (Representative for GIBAUD in Poland), AKSON - Medical device retail chain, OXYGEN - Professional medical market (clinics/hospitals) and LUXMED, SPSR – Hospitals.

The world of orthotics moves very fast and makes stupendous progress each year. The role of each product is more and more recognised for each concerned pathology and very often as the first level of treatment. Effectiveness, physical qualities but also comfort and aesthetic have to be taken into account, as an orthopaedic medical device must be accepted and adopted by patients to be worn.

The role of each actor is major: the producer should improve the quality of his products and offer innovation to increase observance, the prescriber has to be informed of the latest developments to prescribe the most appropriate and efficient product, the applicator will give the right size and will adapt and personalize the device for each patient. That is why we organise this symposium; to meet each other in order to improve the final service to the patient, which is our mutual goal!

It is a real pleasure to welcome you to the second medical Gibaud symposium in Poland, and I hope that you will have an interesting and constructive symposium.

Yours sincerely,

Eric Hafkamp  
International Sales Director  
GIBAUD SA
